ALM-B + PRE-4

Classroom Teaching Amplifier

PRE-4

ALM-B

Specifications

- This teaching amplifier includes a preamp mixing panel, amplifier functions, and mixing functions for school campus broadcasting signals.
- Adopt a pre-stage and power-stage separation design.
- The teaching amplifier has a power output of 20W or more.
- During regular teaching, teachers can use it as a teaching amplifier. When there is a need for campus broadcasting, mixing input is adopted.
- The preamp mixing panel is made of metal and can be placed independently directly below the blackboard or at a position designated by the teacher for easy use and maintenance.
- The preamp mixing panel has 1 microphone input jack and 1 audio source input jack, each with two independent volume knobs. It can be configured as 2 microphone inputs or 2 audio source inputs, and multiple panels (more than 5 sets) can be connected in parallel for use.
- When the microphone and audio source are plugged into the preamp mixing panel, it will power on automatically; when unplugged, it will power off.
