ICP-5180
Central Control Unit

Product Features

- **TCP/IP control:** transmit video & control signals via internet.
- **Scheduling & auto-broadcasting:** schedule hourly chime, daily routine, and special event promotion in advance; the system would execute broadcasting automatically and announce the messages to the monitors, digital signage, and electronic marquee on site.
- **Multi-channel play:** transmit 8 different sources (audio, text, video) to different zones at the same time. It's ideal for the multimedia teaching and exam at school.
- **Mobile & remote control:** use APP to execute broadcasting with telephone, VoIP, and TTS mode.
- **Energy-saving:** based on the scheduling, the system can intelligently control the power of AV equipment, light, air-conditioner, and other equipment, which saves energy and ensures the safety of electric use.
- **Equipped with a service button:** press the button when the system has unusual conditions. The system would transmit the user's information and system's condition back to BXB's headquarter. It efficiently realizes remote troubleshooting.
