Catch up with digital trend, make meetings smoother, more convenient, and stable!

BXB's EDC series is an economical and highly-efficient conference system, with installation cases worldwide numbering in the hundreds.

With the trend of digitalization and ESG, BXB has upgraded the EDC-1000 to EDC-2000-V2 series, offering faster connectivity, easy maintenance, and a higher level of integration. This upgrade helps your enterprise stay aligned with digital trends and brings more business value.

You don't need to replace the entire system and can mix old and new models. If you haven't upgraded yet, now is the perfect time!

Upgrade Advantages?

Better sound performance

Convenient installation & maintenance

EDC-1000 series OLD	EDC-2000-V2 series NEW	Product Upgrade
 Unit connector : Mini DIN-Y	 Unit connector : RJ-45	Shielded RJ45 reduces noise interference, resulting in clearer sound quality and a more stable, secure system. Flexibly deploy a daisy chain, ring, tree, or star topology based on the room layout.
 Headphone jack	 Headphone jack	Adjust the position of the headphone jack to the front and adding a recording jack. Making the operation more intuitive and meets the demand for audio recording.
 Mic unit connector : DB-9	 Mic unit connector : RJ45	S/N ratio increased to ≧ 90dB: greatly reduces audio distortion and signal attenuation.

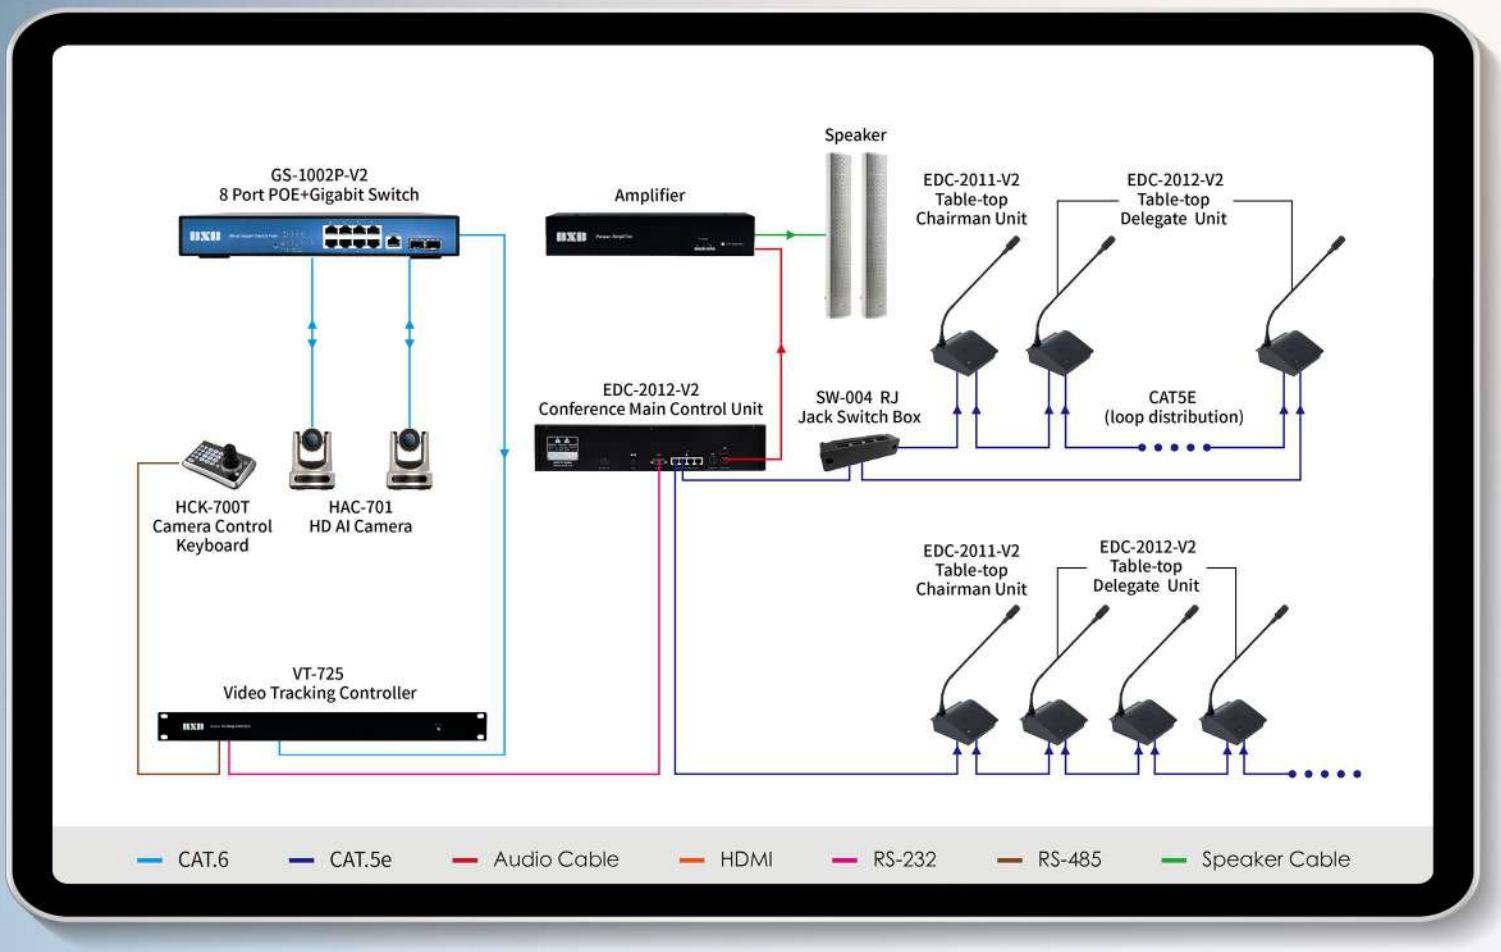

Enhanced integration capabilities
More comprehensive applications

Integration of image-tracking

With BXB VT-725 Video Tracking Controller and PTZ cameras,
the system can quickly track speakers and take close-up shots,
making it clear to be seen by all participants,
ensuring a smooth and immersive meeting experience.

Integration of image-tracking

Product upgrade plan

1.VT-725 Video Tracking Controller

2.HAC-701 HD AI Camera

3.EDC-2051-V2 Conference Main Control Unit

4.EDC-2011-V2/2012-V2
Table-top Chairman /Delegate Unit

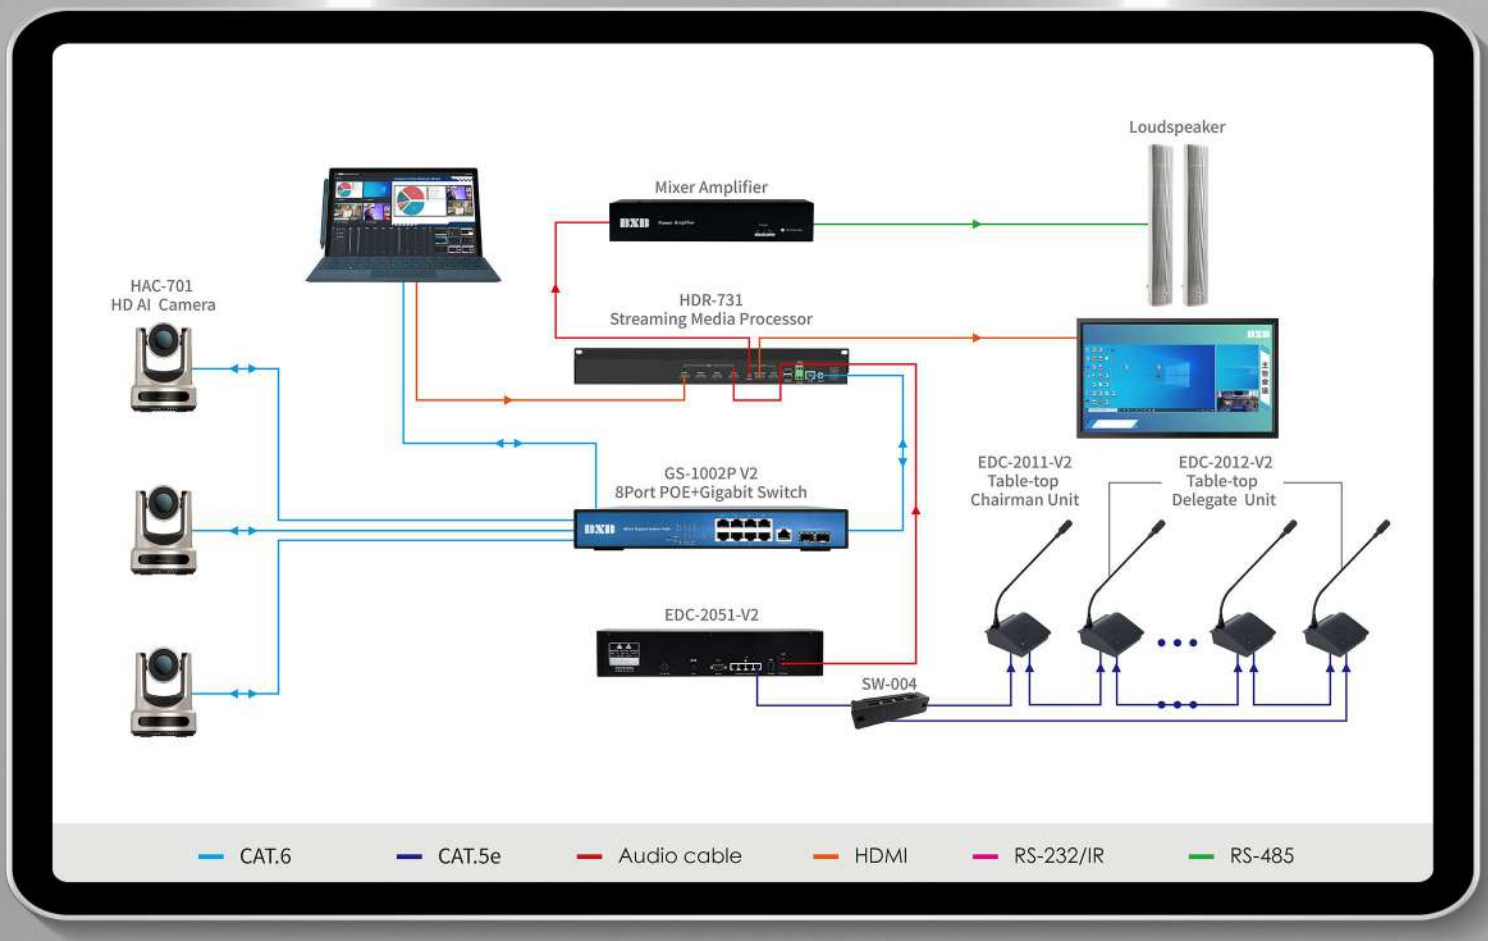

Enhanced integration capabilities
More comprehensive applications

Integration with capturing & live-streaming

With BXB HDR-731 Streaming Media Processor,
the entire conference process can be recorded without
the need for manual note-taking.
You can also stream to platforms such as YouTube and Facebook,
enhancing marketing effectiveness and outreach.

Integration with capturing & live-streaming

Product upgrade plan

1.HDR-731 Streaming Media Processor

2.HAC-701 HD HD AI Camera

3.EDC-2011-V2 / 2012-V2
Table-top Chairman /Delegate Unit

4.EDC-2051-V2 Conference Main Control Unit

ESG-friendly product upgrade approach

When upgrading products, BXB not only considers environmental protection but also takes into account the sustainable development of society and enterprises to ensure customer satisfaction and the use with trust.

Therefore, the EDC-2000-V2 series has been upgraded to standard CAT-5E connection, which has a smaller environmental impact in terms of raw materials and production processes, and also reduces power consumption during use, thus reducing carbon footprint.

What's even greater is that you don't have to replace the entire system. Just upgrade the control unit, you can mix the EDC-2000 and EDC-1000 microphones based on your needs. It not only saves more your purchasing costs but also reduces resource waste.

Practicing ESG is not only our responsibility, but also of each individual. With product upgrades, you can easily take the first step in smart meeting room and embrace the trend of digital transformation. We believe that this solution can bring you more value while contributing to the environment.
